

# DMO Common Weather Workshop

(see Schedule for date & time)  
in the conference theater

**Attendance limited to IMAGE 2012  
Registered Full Conference Attendees.**

**Your active participation is requested!**

## AGENDA

The DMO Common Weather Workshop will bring together people and programs interested in an interactive exchange of information about common distributed weather simulation, to include military and industry stakeholders. The Workshop will be orchestrated by the Air Force Research Laboratory's (AFRL's) Rehearsal Enabling Simulation Technologies (REST) team.

The Workshop program will include:

- **Introduction** (Steve Stephens, AFRL/RHAS).
- **Emerging requirements** to include those of the USAF Air Combat Command (Walter Johnson, ACC)
- **Weather data sources** (Vince Irizarry, AFRL & Steve Lowe, AER)
- **Existing weather simulation capabilities/correlation across the image generator vendor base** (Jay Bollinger, AFRL)
- **Demonstrable progress to date and potential solution paths** (Vince Irizarry, AFRL)
- **Additional discussion items/way forward** (all attendees)

We look forward to an interesting and interactive Workshop concerning this complicated DMO issue.
