

**Military pilots demonstrate an L-3 Link Simulation & Training UH-60M helicopter simulator during a training exercise.**

For 33 years, Professor Cardullo has assembled a team of simulation experts to provide technical training to thousands of industry professionals in the annual **Flight and Ground Vehicle Simulation Course** which covers many topics including Simulation Fundamentals, Mathematical Modeling, Computer Image Generation and Distributed Simulation/High Level Architecture.

The course will be held January 23-27, 2017. In addition, there will be four specialized advanced courses offered on January 30-31, 2017 covering **Visual System Specification and Acceptance Tests, Visual Database Design, Simulation Interoperability Standards** and a new course on **Next Generation Display System Requirements, Metrics and Measurements**. Register by October 14<sup>th</sup> to take advantage of our early bird fees.
