

For 34 years, Professor Frank Cardullo has assembled a team of simulation experts to provide technical training to thousands of industry professionals in the annual **Flight and Ground Vehicle Simulation Course**. The training covers many topics including Computer Image Generation; Simulation Fundamentals; Motion and Force Cueing; Simulator Systems Integration; Visual Perception; Visual Display Systems; Mathematical Modeling of Vehicle Dynamics; Simulation Validation and Evaluation of Flight Simulators; Simulation Applications in Training; Flight Simulator Qualification; Flight Control System Simulation; and, Engineering Principles Enabling Live-Virtual-Constructive (LVC) Simulation Solutions.

The course will be held January 22-26, 2018. In addition, there will be two specialized advanced courses offered on January 29-30, 2018 covering **Visual System Specification and Acceptance Tests** and **Next Generation Display System Requirements, Metrics and Measurements**. Register by October 13, 2017 to take advantage of our early bird fees.
